DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-7, drawn to specific disc cutter attributes, classified in class 83, subclass 500.
 - II. Claims 8-11, drawn to specific drum cutter attributes, classified in class 83, subclass 505.
 - III. Claims 12-14, drawn to a combination of specific disc cutter attributes and specific drum cutter attributes, classified in class 83, subclass 495.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions of group I and group II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, the specific disc cutter attributes of group I could be employed without the specific drum cutter attributes of group II, and conversely, the specific drum cutter attributes could be employed without the specific disc cutter attributes of group I. See MPEP § 806.05(d).
3. Inventions of group III and groups I and II are related as combination and subcombination. Inventions in this relationship are distinct if there is evidence that the combination does not rely on the subcombination for patentability. See MPEP 806.05 (c), example 3. Group II is evidence that the combination of group III does not rely on the specific disc cutter attributes of group I for patentability, and conversely, Group I is evidence that the combination of group III does not rely on the specific drum cutter attributes of group II for patentability.

Art Unit: 3724

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

5. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas J. Druan, Jr. whose telephone number is 703-308-4200. The examiner can normally be reached on M-F (8:30-6:00) First Friday Off.
